OBJECTIVE

I'm looking forward to build a base as big as possible in everything related to software. I enjoy working with the largest spectrum of technologies, from decoding file formats all the way to full stack web development.

EDUCATION

Bachelor of Computer Science | Bábes Bolyai University
2020 – EXPECTED 2023

Computer Science & Mathematics degree | Tiberiu Popoviciu Highschool
2016 – 2020

Finished with a Romanian Diploma Of Baccalaureate, 9.95/10

EXPERIENCE

Kotlin Developer | Montran Corporation

MAY 2022 – PRESENT

Currently tasked with the implementation of a mobile payment system for the Trinidad & Tobago Islands.

Fullstack Web Developer | Freelancer

NOV 2021 – PRESENT

Worked on a couple of full-stack web projects contracted on freelancer.com. Last one was completed in February 2022.

Software Developer Internship | Hypermedia

OCT 2019 – MARCH 2020

The main focus of this internship was learning about good design patterns & best practices in the Android Development world. I've mainly used Kotlin and Firebase.

Fullstack Developer | DPIT Association

DPIT is a mentorship program organized each summer where highschool students get to experience working in a real IT company and develop their own product from scratch.

3Pillar Global

SUMMER 2018 – AUTUMN 2018

Our team has developed a Tinder for dogs, Dogly. We got a special award by Arobs Transilvania Software and I did an interview for a local newspaper about our project.

Fortech

SUMMER 2017 – AUTUMN 2017

We built an app called "Don't waste time", a mobile application that showed you the shortest path to all your groceries inside a store. We got the 3Pillar Global special award.
